heatilator®

The first name in fireplaces

about us

In 1927, Heatilator introduced the first factory-built air-circulating fireplace. The brand name quickly became a household word-the “first name in fireplaces”.

Even today, many consumers refer to any heat-circulating fireplace as a Heatilator. But once they’ve owned a genuine Heatilator, they’ll know the difference.

Not only is Heatilator the most widely recognized name, but thanks to our long-standing reputation for quality and reliability, Heatilator is also the preferred brand among homebuilders. Leading builders choose Heatilator because they know that the brand assures their customers many, many years of comfort and reliability.

Why Heatilator: First time homebuyers, homebuilders and custom home experts agree. Heatilator is the number one choice. Its well-crafted heating sources run the gamut from fireplaces to gas logs, providing gas-burning solutions to make any space feel like home. Most importantly, value is high on the list of this most recognized brand. It’s one thing to build the perfect fireplace. But Heatilator goes one step further by making it’s products affordable and dependable at the same time.

Wood Burning Series

The Accelerator features meticulous craftsmanship for robust fires and an impressive appearance. Multiple fronts and traditional or herringbone brick panels add individual style to the accelerator's valued performance.

- 36" or 42" viewing area
- Choose from optional bi-fold glass doors, or a gasketed cabinet-style door
- Available in either radiant or circulating heat option to fit your space

Direct Vent Fireplace Systems

Standard Features:

- ♦ Glowing embers, realistic fiber logs and attractive finishing options add character to any space
- ♦ Multiple sizes and designs allow for a variety of installation including corners and tight spaces
- ♦ Natural gas and propane available
- ♦ Standard full coverage safety screen

Direct Vent Technology:

Unvented or vent free fireplaces can literally turn your house into a chimney, causing health problems for your family. Thanks to patented Direct Vent Technology, your fireplace can use outside air for combustion, expelling 100% of the combustion exhaust and by-products. This means a pleasant heating experience without the presence of exhaust, fumes, soot and strong combustion odors.

IntelliFire /IntelliFire Plus Technology

IntelliFire is an alternative to a standing pilot fireplace and features intermittent-pilot ignition (IPI) allowing you to conserve fuel and money when the fireplace is not in use.

Novus Series

The Novus is everything you need to provide your family and friends the comfort which has made it the best-selling gas fireplace of all time. The versatile Novus gas fireplace with glowing embers fits into almost any lifestyle and space, where other fireplaces can't. Relax in knowing the industry's most recognized brand delivers long-lasting performance, allowing you to make fireside memories for years to come.

- Make it your own by customizing the front of your fireplace with different styles, finishes and traditional brick panels
- Install anywhere with a design that's perfect for corners with multiple venting options
- Adjust flame, heat and ambiance with built-in controls
- Available in sizes to meet your needs
